

Cyber Accreditation Support

Expert consultancy to accelerate accreditation and strengthen security.

Recognised security accreditations are essential for building trust among customers, employees, supply-chain partners, regulators and stakeholders. Securing ISO 27001 certification, achieving Cyber Essentials or Cyber Essentials Plus, or maintaining compliance with shifting regulations - the process can be complex and time-consuming. Businesses risk delays, inefficiencies, or even failing audits altogether without the right expertise.

Roc's Cyber Accreditation Support service ensures your organisation is fully prepared to meet accreditation standards—faster and more effectively. Acting as your virtual Chief Information Security Officer (CISO), we work alongside your IT team to assess your current security posture, identify gaps, and develop a tailored roadmap to compliance. Our specialists bring deep security expertise, helping to embed best practices, guide remediation efforts, and ensure your business meets the highest security standards without overburdening internal resources.

Ideal for you if...

- ▶ You need to achieve or maintain ISO 27001, Cyber Essentials, or Cyber Essentials Plus
- ▶ You want to enhance in-house expertise to support the accreditation processes
- ▶ You want to strengthen security policies and governance frameworks
- ▶ You need to align with evolving compliance requirements
- ▶ You want to accelerate the accreditation process without overstressing internal teams

Why Roc?

24/7/365 In house MSOC	100% UK coverage	70+ highly trained engineers	100% engineers SC or DV cleared
CYBER ESSENTIALS PLUS accredited	ISO9001 accredited	14001 accredited	27001 accredited

Service overview

Accelerate your path to accreditation

We help organisations achieve compliance efficiently with a structured, expert-led approach - minimising delays, streamlining audit preparation, and ensuring faster accreditation success. We provide in-person guidance throughout the accreditation journey - from documentation review to audit preparation. Our team ensures your policies, procedures, and technical controls align with the latest standards, reducing the risk of non-compliance.

Specialist security expertise

Our security consultants enhance your existing IT team with advanced knowledge of accreditation requirements, best practices, and regulatory frameworks. We act as an extension of your team, offering hands-on support that strengthens your overall security posture.

Expert-led insights

Our consultants conduct a thorough assessment of your existing security controls, policies, and processes, identifying areas that need improvement. We provide a clear, step-by-step remediation plan to help you meet accreditation requirements efficiently.

Regulatory guidance and continuous compliance

Cybersecurity regulations and best practices are constantly evolving. Roc provides expert advice on changing laws and compliance requirements, ensuring your security strategy remains aligned with industry expectations and your business needs. We support the creation of corporate policies, security frameworks, and access controls to build a robust, long-term security posture.

Cyber Accreditation Support

Our approach includes:

- ▶ **Readiness Assessments:** full gap analysis of your readiness for audit, available as either a point-in-time assessment or as part of a continual assessment programme.
- ▶ **Remediation plan:** identifying the opportunities to improve, and implementing recommendations to support the accreditation process
- ▶ **Audit support:** onsite support from our expert consultants on the day of the audit

Service benefits

- ▶ Faster accreditation with a structured, expert-led approach
- ▶ Strengthen cybersecurity policies and governance
- ▶ Reduce risk of non-compliance and failed audits
- ▶ Support your IT team with specialist security expertise
- ▶ Stay ahead of changing laws and regulations
