Roc

Cyber Readiness Assessments

Identify, prioritise and mitigate you cyber security risks

Cyber threats are evolving every minute. Organisations need more than a checklist to assess their security posture. Traditional compliance-driven approaches often overlook real-time risks and vulnerabilities. Businesses can be left exposed to potential breaches, financial loss and reputational damage without a clear, data-driven understanding of cyber risks.

Roc's Cyber Readiness Assessment goes beyond standard security audits by leveraging realtime technical tools to monitor your applications and networks. Our expert-led approach provides a comprehensive evaluation of your organisation's cyber resilience, highlighting strengths, weaknesses and actionable areas for improvement. The result is a tailored security roadmap that supports compliance, risk mitigation and cyber insurance assessments, ensuring your organisation is prepared for emerging threats.

Ideal for you if…

▶ You need a clear understanding of your cyber-risk exposure

▶ You want to improve compliance with security frameworks like ISO 27001 and Cyber Essentials

▶ You are preparing for a cyber insurance review and want to reduce premiums

▶ You lack real-time visibility into external-facing threats and vulnerabilities

▶ You want to optimise your cybersecurity investments and ensure resources are allocated effectively

Why Roc?

24/7/365 In house MSOC	100% UK coverage	70+ highly trained engineers	100% engineers SC or DV cleared
CYBER ESSENTIALS PLUS accredited	ISO9001 accredited	14001 accredited	27001 accredited

Service benefits

▶ Gain real-time visibility into security risks and vulnerabilities

▶ Strengthen compliance posture with ISO 27001 and Cyber Essentials support

▶ Prioritise cybersecurity investments for maximum impact

▶ Reduce cyber insurance premiums by demonstrating risk mitigation

Service overview

Realtime risk assessment

We deploy on-premises, read-only data collectors and external scanning tools to monitor in-scope assets and assess vulnerabilities in realtime, rather than relying solely on static security audits. This approach identifies potential attack vectors, misconfigurations, and external-facing risks, providing a holistic understanding of your security posture.

Expert-led evaluation

Our cybersecurity specialists conduct a thorough analysis of your security environment. This analysis combines automated scans with strategic insights to identify vulnerabilities. The assessment results can be used to support ISO 27001, Cyber Essentials, and cyber insurance applications, giving you confidence in your compliance efforts and risk management.

Tailored recommendations for risk mitigation

Security risks are not one-size-fits-all. We provide a customised, context-driven report that prioritises your most critical vulnerabilities. You can efficiently allocate cyber resources to strengthen defences, mitigate risks, and proactively address security gaps with clear, actionable recommendations.

Strategic planning for cyber resilience

Beyond immediate risk identification, we help you develop a long-term cyber improvement plan. We ensure your organisation is positioned to adapt to evolving threats while optimising security costs and operational efficiency by aligning cyber-security investments with business objectives.

Service Overview

At Roc, we create a holistic view of your cyber risks, strengths, weaknesses.
Areas explored can include, among others:

▶ Asset Management

▶ Email Security

▶ Brand and third-party reputation

▶ External attack surface

▶ Privileged access

▶ Cloud Application security

▶ Exposed credentials

▶ Compliance analysis
